NAME:_____ CLASS:_____

SECTION A (20 MARKS)

1 You are provided with specimen labeled R.

a) i. Identify the major element in specimen labeled R

_____ **(1 mark)**

ii. State any **two** functions of the major element in 1(ai) above

_____
_____
_____
_____ **(2 marks)**

iii. Apart from specimen R, name any **two** sources of element mentioned in 1(aii) above in livestock production

_____
_____
_____ **(2 marks)**

b) i. State any **one** importance of the type of root system labeled P in crop Production

_____ **(1 mark)**

ii. If a farmer is growing crops with the above root system, suggest the advice you would give him/her in terms of

1 frequency of irrigation

_____ **(1 mark)**

2 Fertilizer placement

_____ **(1 mark)**

iii. State **one** reason for each of the responses given in question 1(bii) above.

_____
_____
_____
_____ **(2 marks)**

NAME:_____ CLASS:_____

2 You are provided with specimen labeled **M, N, O**

a) i. Identify the type of enterprise if a farmer is growing specimen M and is keeping Poultry at the same time.

_____ **(1 mark)**

ii. Explain the answer in **2a (i)**

_____

_____

_____ **(2 marks)**

iii. Explain why it is beneficial to provide specimen M to egg laying chickens.

_____

_____

_____ **(3 marks)**

b) Explain any **two** benefits of growing specimen N and O together in one field.

_____

_____

_____

_____ **(4 marks)**

SECTION B (20 MARKS)

3 a) Table 1 shows an experimental design on a maize variety trial. The information collected in this experiment is shown in blackest in the same experimental design. Use it to answer the questions that follow

	BLOCK I	BLOCK II	BLOCK III
Plot 1	NSCM 41 (40kg)	Local maize (10kg)	MH 12(13kg)
Plot 2	Local maize(8kg)	MH 12 (16kg)	NSCM 41 (32kg)
Plot 3	MH 12 (14kg)	NSCM 41 (36kg)	Local maize (6kg)

i. Name the type of experiment design.

_____ **(1 mark)**

ii. How many treatments does this experiment have?

_____ **(1 mark)**

iii. Identify the control of the treatment in this experiment

_____ **(1 mark)**

iv. What evidence is there to show that the results of the experiment may be reliable?

_____

_____ **(1 mark)**

v. Give any **two** ways of analyzing the information collected in this experiment in order to compare the treatments.

_____

_____

_____

_____ **(2 marks)**

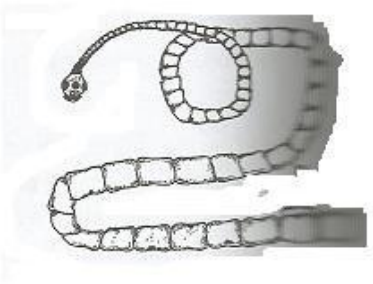
vi. Analyze the information for the local maize.

_____

_____

_____ **(1 mark)**

b) Below is a diagram showing an internal parasite of some livestock. Use it to answer the questions that follow.



i.State any **one** ways of controlling the above parasite.

_____

_____

_____ **(1 mark)**

ii. Explain any **one** ways in which the above parasite can affect meat yield of the livestock.

_____

_____

_____

_____ **(2 marks)**

NAME:_____ CLASS:_____

4 An Agriculture teacher gave Ivy, Hanwell and Natasha the following items:

- Test tubes
- Universal indicator solution
- Indicator color chart
- Barium sulphate powder
- Soil sample
- Distilled water

Describe an experiment that would be done by these students to determine the PH of the soil sample given

(10 marks)
