FULL NAME _____ CLASS _____

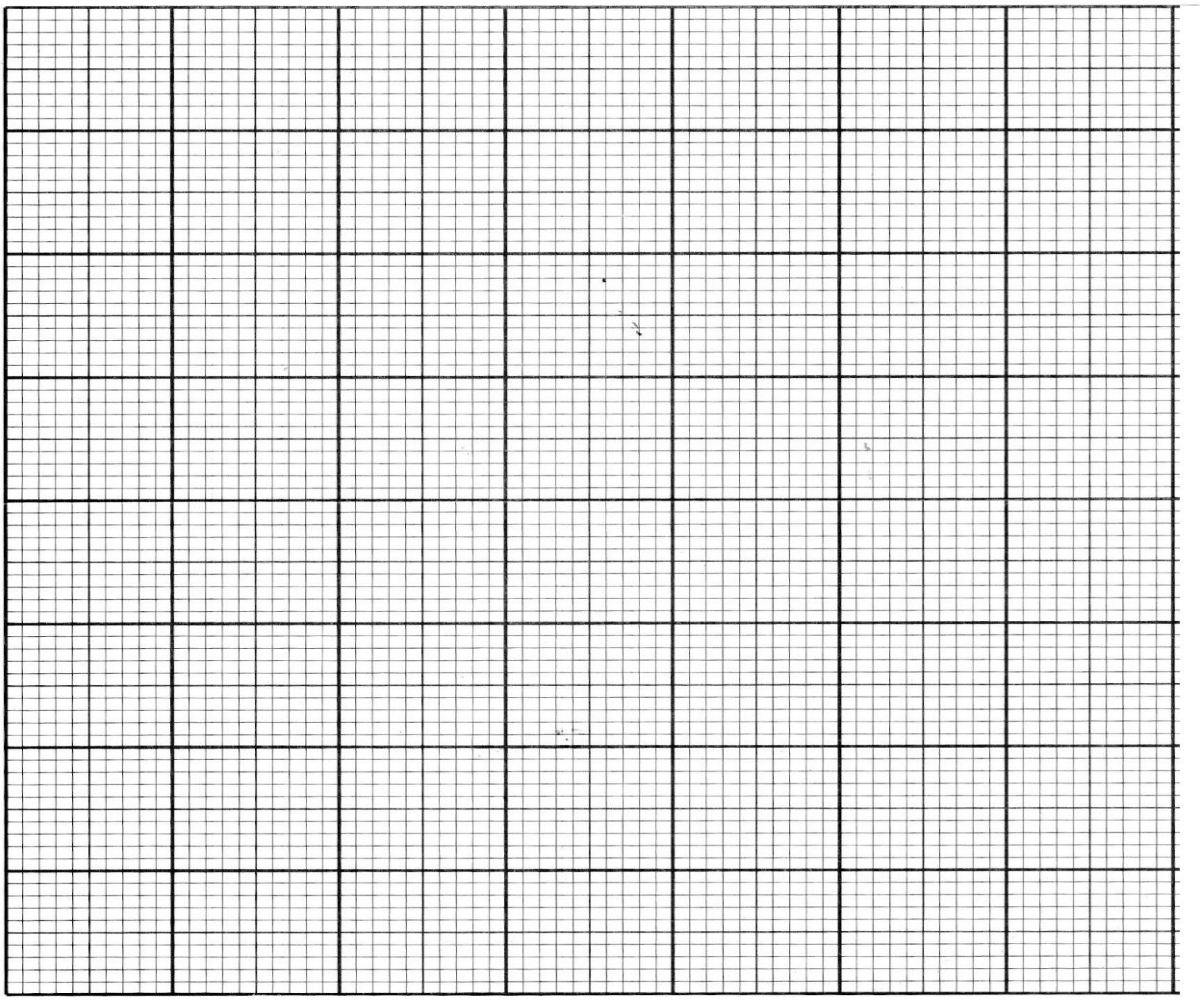
2. The table below shows service life in years and value in Kwacha of a spray race. Use it to answer questions that follow.

| Service life in years | Value (MK) |
|---|---|
| 1 | 150,000 |
| 2 | 130,000 |
| 3 | 110,000 |
| 4 | 90,000 |

a. Plot a graph showing value of the spray race on **Y**-axis and service life in years on **X**-axis.



(3 marks)

FULL NAME _____ CLASS _____

b. From the graph plotted in **2 a** state the relationship between value of the spray race and its service life.

_____

_____

_____

(2 marks)

c. What does slope of the graph plotted in **2 a** show?

_____

_____ (2 marks)

d. Using the plotted graph in **2 a** determine the value of the spray race by the end of 3½ years.

_____

_____(1marks)

e. If the spray race's life span was 6 years, calculate the salvage value of the spray race.

(3 marks)

**SECTION B (20 MARKS)**

FULL NAME _____ CLASS _____

3. You are provided with specimen **Y**. Use it to answer questions that follow.

   a. State any **two** processing activities through which specimen Y undergo in readiness for storage.

_____

_____(2 marks)

   b. Give any **one** condition which is required in the storage of specimen **Y**

_____(1 mark)

   c. (i) Mention the type of price elasticity of demand which specimen **Y** have on the market

_____(1 mark)

   (ii). Give a reason for your answer in c(i)

_____(1 mark)

   d. Sketch a graph of price elasticity to illustrate the demand in c (i)

(3 marks)

   e. Explain any **one** importance of crop processing

_____

_____

(2 marks)

FULL NAME _____ CLASS _____

4. You are provided with three samples of soil labeled A, B and C. Use them to answer the questions that follow. Rub each soil sample in between finger and thumb.
   a. Identify the soil samples **A** and **B**
      A: _____
      B:_____(2 marks)
   b. Mention the method used to identify the soil samples A and B
      _____(1 mark)
   c. State **two** way of improving productivity of soil sample B
      _____
      _____(2 marks)
   d. Explain any **one** reason why soil sample C is best for maize production
      _____
      _____(2 marks)
   e. Which soil sample is likely to be more acidic
      _____(1 mark)
   f. Explain your answer in (e) above
      _____
      _____ (2 marks)

**END OF QUESTIONPAPER.**
