

OXFORD ACADEMY OF SCIENCE, COMMERCE & ARTS

Defence Road Hotel Javson Street Sialkot

Tel: 0345-6757872

UNIT 14,15

Subject Name: 2nd Year/Chemistry 12

I) Tick the correct option:

(All questions / options – 20 / 0) 20 Marks

1. Which element is not present in all proteins:

a) carbon	b) hydrogen	c) nitrogen	d) sulphur
-----------	-------------	-------------	------------

Correct Answer
sulphur

2. Percentage of nitrogen in urea is:

a) 76%	b) 56%	c) 46%	d) 86%
--------	--------	--------	--------

Correct Answer
46%

3. Which one is not a calcareous material?

a) lime	b) marble	c) clay	d) marine shell
---------	-----------	---------	-----------------

Correct Answer
clay

4. The reaction between fat and NaOH is called:

a) esterification	b) hydrogenolysis	c) fermentation	d) saponification
-------------------	-------------------	-----------------	-------------------

Correct Answer
saponification

5. Argillaceous material in the following is:

a) lime	b) clay	c) marble	d) marine shell
---------	---------	-----------	-----------------

Correct Answer
clay

6. Diammonium phosphate contains:

a) 18% nitrogen	b) 48% P_2O_5	c) 85% plant nutrients	d) 10% nitrogen
-----------------	-----------------	------------------------	-----------------

Correct Answer
48% P_2O_5

7. The nitrogen present in fertilizers helps plants:

a) to fight against disease	b) to produce fat	c) to produce protein	d) to produce carbohydrates
-----------------------------	-------------------	-----------------------	-----------------------------

Correct Answer
to produce protein

8. The fertilizer, which contains 46% N is:

a) urea	b) ammonia	c) ammonium nitrate	d) none of these
---------	------------	---------------------	------------------

Correct Answer

urea

9. The percentage of nitrogen of nitrogen in ammonium nitrate is:

a) 46%	b) 82%	c) 33%	d) 16%
--------	--------	--------	--------

Correct Answer

33%

10. Vegetable oils are:

a) unsaturated fatty acids	b) glycerides of unsaturated fatty acids	c) glycerides of saturated fatty acids	d) essential oils obtained from plants
----------------------------	--	--	--

Correct Answer

glycerides of unsaturated fatty acids

11. Which statement about glucose and sucrose is incorrect?

a) both are soluble in water	b) both occur naturally	c) both are carbohydrates	d) both are disaccharides
------------------------------	-------------------------	---------------------------	---------------------------

Correct Answer

both are disaccharides

12. Which one of the following enzymes brings about the hydrolysis of fats?

a) urease	b) maltase	c) zymase	d) lipase
-----------	------------	-----------	-----------

Correct Answer

lipase

13. Plastics are a pollution problem because many plastics are:

a) very inflammable	b) made from petroleum	c) burn to toxic fumes	d) decompose to produce toxic products
---------------------	------------------------	------------------------	--

Correct Answer

decompose to produce toxic products

14. Degree of polymerization is useful in:

a) classification of polymers	b) calculating the molecular mass of monomer	c) calculating the molecular mass of monomer	d) both b and c
-------------------------------	--	--	-----------------

Correct Answer

calculating the molecular mass of monomer

15. The number of zones through which the charge passes in a rotary kiln during manufacture of cement are:

a) 2	b) 3	c) 5	d) 4
------	------	------	------

Correct Answer

4

16. The hottest zone in the rotary kiln is:

a) drying	b) pre-heating	c) burning	d) decomposition
-----------	----------------	------------	------------------

Correct Answer

burning

17. Which of these polymers is an addition polymer:

a) nylon 6,6	b) polystyrene	c) terylene	d) epoxy resin
--------------	----------------	-------------	----------------

Correct Answer

polystyrene

18. Starch is:

a) monosaccharide	b) disaccharide	c) polysaccharide	d) oligosaccharide
-------------------	-----------------	-------------------	--------------------

Correct Answer
polysaccharide

19. Phosphorus helps the growth of:

a) seed	b) root	c) leaves	d) stem
---------	---------	-----------	---------

Correct Answer
seed

20. Which is a synthetic polymer?

a) animal fat	b) cellulose	c) starch	d) polyester
---------------	--------------	-----------	--------------

Correct Answer
polyester

II) Write short answers to these questions:

(All questions / options – 20 / 5) 30 Marks

1. Define enzyme. Name their two properties.

a) 0

2. Differentiate between conjugated and derived proteins. Give one example in each case.

a) 0

3. Define Epoxy resins. Give their importance.

a) 0

4. Discuss the chemistry of setting of cement in first twenty four (24) hours.

a) 0

5. Name commonly used bleaching agents in paper manufacture.

a) 0

6. What is Manure?

a) 0

7. Classify the polymers on the basis of types of monomers.

a) 0

8. Explain the importance of potassium fertilizers.

a) 0

9. Define paper. Give important raw material for the manufacture of paper.

a)

0

10. Why wet cleaning is done in paper manufacture?

a) 0

11. Ammonium nitrate is a useful fertilizer for many crops except paddy rice, why?

a) 0

12. How polystyrene is prepared?

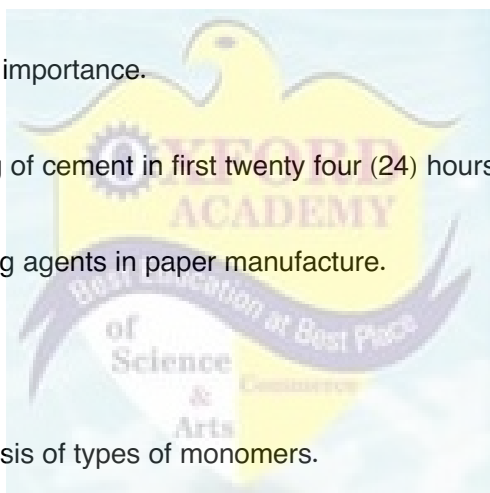

a) 0

13. What is difference between glucose and fructose?

a) 0

14. Give an idea about clinker.

a) 0

15. Why nitrogen is important for plants?

a) 0

16. Name commonly use bleaching agents in paper manufacture?

a) 0

17. Mention three important raw materials for the manufacturing of Cement.

a) 0

18. Give different zones in rotary kiln and their temperature ranges.

a) 0

19. Ammonia act as a fertilizers. Comment.

a) 0

20. Just name four factors affecting the activity of enzyme.

a) 0
